

Transformations

Hope for today's families

Amada Alexander

attended a Targeted Case Management Training which covered

- | | |
|--|---|
| <input type="checkbox"/> engaging consumers and family members | <input type="checkbox"/> integrated care |
| <input type="checkbox"/> behavioral health crisis management | <input type="checkbox"/> advocacy skills and empowering consumers and families |
| <input type="checkbox"/> strengths based case management | <input type="checkbox"/> cultural awareness |
| <input type="checkbox"/> ethics | <input checked="" type="checkbox"/> developmental perspectives across the life span |
| <input type="checkbox"/> behavioral health diagnosis and understanding treatment | <input checked="" type="checkbox"/> documentation and billing |

on 2/4/16 which was presented by Randy Arnold, LHA for 2.0 hours.

TCM Supervision Training

Date: 02/4/16

Information Presented:

The following competencies and content were reviewed.

- A review of core areas on concern for TCM to address with clients and families. These include Housing, Medical, Educational, Social, Community and Safety
- an experiential exercise was conducted walking the TCM's through a case using information from other forms and integrating this material onto the Needs assessment form
- The idea of using the needs assessment as a "keystone" or integrating document used to assist in filling out other needed forms
- The concept KAR and KRS and what regulations this document addresses
- Using the document to structure and enhance conversation with client's and families
- Using the document to assist in gathering and organizing relevant information
- a review of the "golden thread" concept of documentation and the other vital documents the Needs Assessment is connected to
